

Autocoherence C_ξ

Peak-agnostic T_ξ

Step 1

Repeat C_ξ calculation* over a range of ξ

Step 2

Integrate C_ξ over ξ

Peak-centric T_ξ

$$\langle z[n + \xi] y^*[n] \rangle_n = \langle e^{i\phi[n + \xi] - \phi[n]} \rangle_n \equiv C_\xi[\xi]$$

Autocorrelate

$$M[n]e^{i\phi[n]} \xrightarrow{\text{Normalize}} e^{i\phi[n]} \equiv z[n]$$

Step 1

Step 3 (optional)

$$\int_0^{\xi_{\max}} C_\xi[\xi] d\xi \equiv T_\xi$$

$$T_\xi \xrightarrow{\text{Convert to \# cycles}} N_\xi$$

Autocoherence Spectral Density $C_\xi^P[f]$

MAGNITUDE-WEIGHTED PHASE ACCUMULATIONS
